

REALBOOK SOFTWARE

VERSION 4.01

Installation and Activation Guide

RealBook Volume 1,
RealBook Volume 2,
Great Jazz Solos, and
Charlie Parker Fakebook

Follow the instructions included in this Installation and Activation Guide before attempting to contact us for installation or activation support. Anything that could be conveyed in a support email has probably already been included here.

Installing and Activating the RealBook Software

Note: Most graphics in this Guide depict the RealBook Software, however the instructions apply to all products.

Insert the Disc into a DVD Drive **not a CD drive** (except the Charlie Parker Software which is a CD). If you have your system preferences set to Autoplay when a new disc is inserted, then the Setup will launch automatically.

To avoid conflicts you may want to de-activate anti-virus, firewall, spam filters, or anything else that might interfere with the installation process.

If setup does not startup automatically then you will need to open the DVD by double clicking on its icon and launch the setup by double clicking the Setup icon.

If you are on the Vista operating system, then there will be some extra windows that popup asking you if you want to allow the setup. For these you will need to click "Allow"

During setup, one of the first screens you will see will be the License agreement. Before proceeding with the installation you'll have to agree to the terms and conditions by clicking on the button to the left of "I accept..."

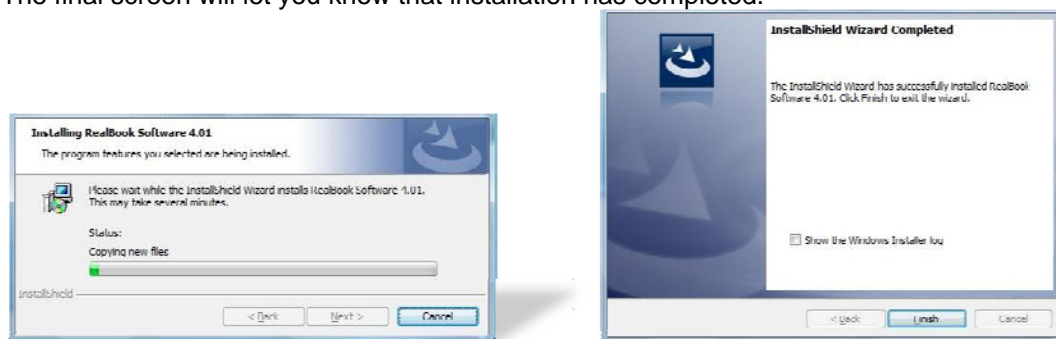

Next you'll be asked for the location where you want the program installed. Unless you are really proficient with computing, it is recommended that you leave the location exactly as it is.

If you do change locations then you might have to go into the program's setup page after installation is complete and input the proper file path for the materials folder so that the program knows where to find the audio files. Otherwise the audio won't play if the system does not know where to find the files.

Vista will pop up one of those "allow" windows here. Again tell it to 'allow' the process.

Several progress windows will be displayed as the program installs. The final screen will let you know that installation has completed.

You are finished installing. Now time to activate the program.

Locate the program's icon on the desktop and double click it to launch. (You can also shorten the name if you like).

You can also launch by double clicking the Program's .exe file from inside the program's folder found in the C:/Program Files directory.

Registering and Activating the Program

What you'll need.

Internet access (yours or someone else's) It doesn't have to be on the "installed" machine.

E-mail address where the activation key will be sent.

Registering

After installing and launching the program the first thing you will see is the Registration Page and countdown screen.

Real Book Software v4.01
Created Using The MusicMaster Librarian Engine

STEP 1 *Enter Your Full Name and Email

Name: Email: Do not hit the key to advance

* Full Name and email address must match the purchase records in our database.
If purchased under a different name, [click here](#)

STEP 2 [Click To Submit Registration By Website](#)

Note: The registration number is automatically copied to the clipboard for you
YOU WILL NOT SEE THE NUMBER UNTIL YOU HAVE FOLLOWED THE NEXT STEPS.

1. When you arrive at the website, position your cursor in the registration number box.
2. Use the Command + V keys to paste the number.
3. Finish filling out the form and submit it.
4. The activation key will be emailed to you, usually within 24 hours.
(Do not submit multiple registrations for the same number please)

STEP 3 After You Have Received The Key, Click Here To Insert It

[Run](#) [Quit](#)

This may only use the program for private study, entertainment, or research.
All the design and content of this program are copyright to the publisher. All Rights Reserved.
© 2004 - 2005 The MusicMaster Librarian v4.01 www.RealBookSoftware.com

You will have 14 days to send in your registration number and obtain an activation key.

The number of days left to activate will be indicated every time you open the program if you haven't registered and inserted the key.

You can run the program for 14 days (without registering or applying the key) by clicking OK on the countdown / reminder Dialog Boxes and then click the Run button.

If you do not register or apply the activation key within the 14 day period then the program will not be accessible until you apply the license activation key.

If you do exceed that time period, once you apply the key the program will resume normal operations.

Step 1.

To register, you'll need to fill out the Name and email address fields.

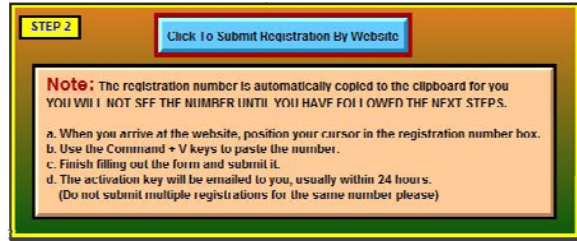

STEP 1 *Enter Your Full Name and Email

Name:

Email:

* Full Name and email address must match the purchase records in our database.
If purchased under a different name, [click here](#)

Step 2.

Next, click the “Submit Registration By Website” button.

This will copy the registration number to your computer's clipboard.

NOTE: You do not need to look for any registration number.

It is done automatically for you.

This number is not seen by you until the next step.

(It isn't really necessary for you to see it anyway).

The Registration web page will automatically.

You can **also** use the Help>Activate menu command to go to the Registration web page.

Or open up your Internet connection and go to

<http://www.MusicMasterLibrarian.com/Register.html>

(this is a clickable link here). This address is case sensitive.

When the web page opens read the guidelines then scroll down the page until you see this form.

Name Of Purchaser **(Required):**

[If you are not the original purchaser click here](#)

Paste Registration Number Here **(Required):**

Product Version **(Required):**

Operating System and Version **(Required):**

E-mail Address Of Purchaser **(Required):**

Alternate E-mail Address:

What search term did you type in when you found us?

What instruments do you play?

Use the CTRL+V keys to paste the number that was stored on your computer's clipboard into the registration number field.

The image shows a registration form with a light green background. At the top, there is a field labeled "Name Of Purchaser (Required):" with a text input box. Below it is a link that says "the original purchaser click here". The next field is "Paste Registration Number Here (Required):" with a text input box. An arrow points from a text box above this field, which contains the instruction "Use the CTRL+V Keys to paste the number from your clipboard into the Registration Number Field". Below the registration number field is "Product Version (Required):" with a text input box and a hint "(2.01, 3.0, Charlie Parker, Great Jazz Solos, etc):". This is followed by "Operating System and Version: (Required):" with a text input box. Then is "E-mail Address Of Purchaser (Required):" with a text input box. Below that is "Alternate E-mail Address:" with a text input box. The next two fields are "What search term did you type in when you found us?" and "What Instruments do you play?", both with text input boxes. At the bottom of the form are two buttons: "Send" and "Reset".

Next, fill out all the remaining fields on the form.

Enter the name and e-mail address that was used to purchase the product.

(If you are not the original purchaser then see the next page for instructions)

The product version is printed on the disc. It was also mentioned in your confirmation e-mail.

Operating system means XP or Vista, Vista 64, for PC.

The remaining fields should be self-explanatory.

After completing the form, click the send button.

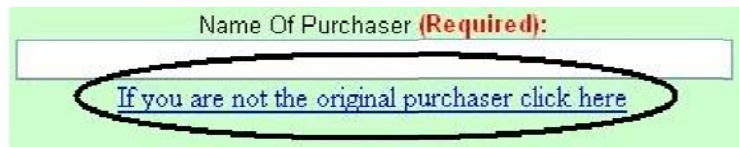

Do Not Repeatedly Register/Submit - Once is plenty.

Make sure that your e-mail address will allow attachments.

Do not use an email addresses that requires a secondary verification. (Earthlink etc.) You will not receive a response.

Let your spam filter know that any e-mails from RealBookSoftware.com are okay.

If you are not the original purchaser then click this link on the web page we were just looking at.

A screenshot of a web form with a light green background. At the top, it says "Name Of Purchaser (Required):" followed by a text input field. Below the input field, the text "If you are not the original purchaser click here" is circled in black. The text is blue and underlined, indicating it is a hyperlink.

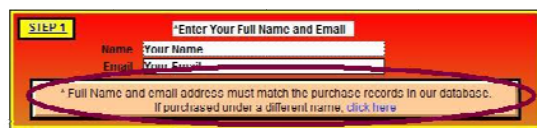

This will open up a different web page.

A screenshot of a web form with a light green background. It contains several input fields with labels: "Full Name Of Purchaser (Required):", "Your Full Name (Required):", "Your Email Address (Required):", "Product (Required):", "Operating System and Version: (Required):", and "Your Address (Required):". At the bottom, there are two buttons labeled "Send" and "Reset".

You'll first need to provide us with this information before you will be able to register and receive a key.

This step can also be done from within the program's Registration Page.

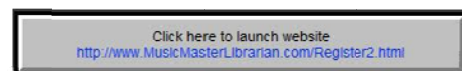

A screenshot of a web form with a red background. It is titled "STEP 1" and "Enter Your Full Name and Email". It has input fields for "Name" and "Email". Below the input fields, there is a note: "Full Name and email address must match the purchase records in our database. If purchased under a different name, click here". The text "click here" is underlined and blue, indicating it is a hyperlink.

Click the link and you'll be taken to a different page

A screenshot of a web page for "Real Book Software v4.01". The page has a black header with the software name and version. Below the header, there is a yellow box with text explaining the registration process. It lists the information required for registration: 1. Who purchased the product for you, 2. Your Full Name, 3. Your Address, 4. Your Email, 5. Which Product, and 6. Operating System and Version. It also states that when the purchase is verified, a new record will be created for the user in the database. At the bottom, there is a button labeled "Click here to launch website" with the URL "http://www.MusicMasterLibrarian.com/Register2.html".

A screenshot of a web page for "Real Book Software v4.01". It features a button labeled "Click here to launch website" with the URL "http://www.MusicMasterLibrarian.com/Register2.html".

Click the link at bottom and this will take you to the same web page that we just mentioned.

After we have verified the purchase, we'll send a confirmation email giving the go ahead to submit a registration number

The e-mail attachment

After we receive this information, someone will generate an activation key that will be attached to an e-mail and sent to the e-mail address(es) that you provided.

This usually happens very quickly but allow 24 to 48 hours since there is a live person involved.

NOTE FOR WEB EMAIL USERS

If you are using a web based e-mail client such as Google, Hotmail, Yahoo, Netscape etc. then you will need to download this attachment and save it onto your computer.

(If you don't have an Internet connection on the installed machine, then you can copy it from your email machine to a thumb drive, floppy or CD etc and transfer it to the installed machine)

This attachment will be named RealBookKey.rbr (with a random number inserted before the .rbr)

You will not do anything directly with this file (for instance double clicking, drag onto icons to launch, etc)

Now we are ready to install the License Key into the program.

Installing the Activation Key

Open/launch the RealBookSoftware program

Step 3.

Click the Gray button titled "After You Have Received The Key, Click Here to Insert It"

This takes you to the Insert Key Page where it will tell you it can't find the file (it doesn't know where you saved it). Click OK.

A window pops up asking you to locate the file that was sent to you. Navigate (browse) to the RealBookKey.rbr file attachment from the e-mail.

Locate the attachment from the e-mail.

You might find it in the e-mail itself, in your e-mail program's attachment folder, or wherever you saved it when downloading it from your web e-mail.

Double click on it or select it and choose "Open". **This will automatically insert the key for you.**

After applying the key, a dialog box pops up telling you about "less records in the data source", etc. This is supposed to happen. Just click "OK" to close the box.

That's It! You are finished installing, registering and applying the key.

Launch the Program

Launch the program using the shortcut icon on the desktop, (or use the one in the program's folder).

If the license key was properly placed, then you will see the opening screen instead of the countdown screen.

If you still see the countdown screen then something wasn't done correctly.

Remember - Every computer requires its own individual key.
Make sure you are not trying to use one computer's key in a different computer.

If there is still an issue, go back and repeat the process while following the instructions very carefully.

Great Jazz Solos Fakebook Software: Release Notes

Every effort has been made to match the transcription to the exact source recording. Huge amounts of research have been applied to achieve these results. In spite of this, there are several transcriptions that do not have matching recordings.

In some cases alternate recordings have been provided where the song and soloist are the same but the exact recorded solo has not been located. (Indicated by ☹)

Two reasons for this. The first is that there are inaccuracies inherent in the original Spaces Volume 6 fakebook. In most cases no such song title exists. (Indicated by ●)

In other cases, the recording possibly exists, but is so obscure that it remains unfindable at the moment. If you happen to have insights or access to these few recordings, please let us know.

Solo start times have also been indicated in the Audio Artist 2 slot, but certain media players may present a slightly different time than the ones indicated, but this is usually only a second or two difference.

Also bear in mind that the transcriptions originate from the prior publication "Spaces Fakebook Volume 6: Jazz Solos". No editing or modifications have been applied to the content, which also includes any inaccuracies present in the notation.

Charlie Parker Fakebook Software: Release Notes

Audio Artist 1 contains audios at full speed.,.

Audio Artist 2 contains audios that play back at half speed. This is helpful on some of the up tempo selections as well as some of the complex lines on ballads.

To play the half speed recordings simply hit the Audio 2 buttons or use the Audio Menus.

Bonus Files:

If a product had bonus files that were also included, then those can be found in a Bonus Files folder inside the Materials folder.

A quick way to access the folder is the Default Folder menus command or the Blue button on the Setup page next to the Default Filepath. These will open the Materials folder.

Troubleshooting

Activation Key

Every computer will require its own activation key content its own unique registration code.

It is important to know that this is not a one-size-fits-all key. Be sure that the registration number you submitted belongs to the computer where you are trying to use the key.

Don't double-click the key file itself. It won't do anything except confuse your computer system.

Don't drag the key file onto the desktop icon. That won't do anything.

If you've made major hardware or system changes and then the activation key might not work correctly. In that case you will need to request a new activation key and provide an explanation of the situation.

Audio

All audio files are proprietary and for use with the program only.

Do not change, edit or in any way alter any aspect of these files (including the file names, tags, images etc.)

Any alteration of these files constitutes a breach of the license agreement and can cause the program to not function.

Default Filepath

If you changed the location of the Materials Folder then you'll need to change the path to the audio files.

Make sure that your Default file path is an exact match to the actual path to the Material's folder.

Go to the Setup Menu>Setup Command>
The default path is indicated there.

Click the blue button. If the path matches the actual location then it will open the folder.

If it doesn't match you'll need to enter the correct file path to the "Materials" folder.
Follow the instructions just underneath the default folder field.

Watch out for extra spaces, Upper/Lower Case mismatches etc.

Windows File Type Associations

If Audio still won't play after you've verified the Default Filepath settings then you'll need to investigate the Windows File Type Associations.

For Windows XP

- a. Open any folder on your computer
- b. Go to the Tools Menu>Folder Options Command
- c. Choose the File Types tab
- d. Scroll down until you get to MP3 and select.
- e. Choose "Change" and Choose which application you want to use to play the file
- f. Use the OK Buttons to conclude the process

For Windows Vista

- a. Open the Control Panel
- b. Double Click the Default Programs icon
- c. Choose the "Associate a file type..." option
- d. Scroll down until you get to MP3
- e. Select which application you want to use to play mp3s
- f. If your desired program isn't in the list then click browse to locate another application.
- g. Use the OK Button to conclude the process

Vista Permissions

If you encounter a Vista popup like this just click continue.

During setup, the installer will tell Vista to grant full permissions. If the program still doesn't run or you are seeing an error regarding a xerces.dll file, then these are issues related to Vista's UAC permissions control.

You might have to manually assign administrator privileges to the entire folder where the program resides.

Follow these steps

- >Go to C:\Program Files
- >Right click on the RealBook's folder.
- >Select Properties
- >Click the Security Tab
- >Select Users (or whichever user you logon as)
- >Click Edit to Change permissions
- >Check the Full Control Box. Click the OK buttons to finish.

The program will now run with full privileges.

Directly access the program's folder

On your main computer screen in the lower left-hand corner you'll see a green button labeled start. After clicking that a window pops up with several options to choose from. Locate and double-click the "My Computer" option.

This will bring up a new window that will show various locations on your computer.

You are looking for the C drive. It might be labeled something like Local Disk (C:). Double-click on the "C drive" and scroll down until you find a folder labeled "Program Files". Double-click on that and scroll down until you find the folder for the program you are activating. Double-Click on that folder to open it. Depending upon the folder's view settings, you should see something like in this example for the *Great Jazz Solos Fakebook Software*

Support

We do not offer phone support available for this product.

We will gladly offer email support for issues stemming from the installation and use of the software.

We cannot help in matters regarding your specific computer hardware, settings, other software etc.

Most problems that typically occur are the result of not having followed the instructions.
In other words, User Error.

Support is offered for issues that have not been covered in this Installation and Activation Guide or on the Support page on the website.

If you have carefully read and followed the instructions outlined in this guide and have checked the online FAQ's yet still cannot resolve your issue then you can submit a Support ticket at www.RealBookSoftware.com/Support.html

The email address is Support@RealBookSoftware.com. This is to be used only after you have read this guide and/or submitted a Support Ticket.

IMPORTANT: Be very detailed in your description of the issue you are having, what specific steps you have taken and where the problem emerges. Also include your operating system.

Vague or brief sentences will only be responded to with a request for more detail and screen shots.

Hostile or abusive language will not receive any response and might lead to your further communications being blocked, filtered and deleted

Include screen shots

This is important since it lets us see what you are seeing and helps to illustrate and pinpoint the exact nature of the problem you are experiencing, instead of trying to guess at it.

Here is how to Take A Screen Shot

Hit the PrtSc key to capture what is showing on the screen.

You can then paste it into a Wordpad document.

To paste additional screen captures use a carriage return after each image.

Paste as many images into the document as are needed to illustrate the problem you are experiencing.

You then save the Wordpad document and attach it in your email.

You can also open up the Paint program and paste the image into there and save each image as a JPEGs and attach them in your email.
