

REALBOOK SOFTWARE

VERSION 5.01-MAC

Installation and Activation Guide

RealBook Volume 1,
RealBook Volume 2,
RealBook Volume 3,
Great Jazz Solos,
Charlie Parker Fakebook
Bill Evans Songs and Solos,
Modern Jazz Guitar Volume 1,
Monster Jazz LTD

Installing and Activating the RealBook Software 5.01

Installing and Activating the RealBook Software For Mac 10.4.9 and above.

Note: Most graphics in this Guide depict the RealBook Software, however the instructions apply to all products.

To avoid conflicts you may want to de-activate anti-virus, firewall, spam filters, or anything else that might interfere with the installation process.

Insert the Disc into a DVD Drive. Double Click the DVD icon for whichever Stand Alone product you are installing in order to display the contents.

Double Click the RealBook.dmg icon. (Volume 1, 2, 3, Great Jazz Solos, etc.)

This will mount the disc image on the desktop. (You can skip the verify to save time)

Double click the mounted image to access the contents. (Volume 1, 2, 3, Great Jazz Solos, etc.)

Double Click the RealBook.pkg icon to launch the installer. (Volume 1, 2, 3, Great Jazz Solos, etc.)

The first screen is an intro screen. Click "Continue".

Next, the license Agreement Page appears. Read the RealBook Software EULA (End User License Agreement). To proceed, click “Continue” then “Agree”.

Click “Install” to proceed. This will install the program into the Applications folder on the hard drive.

A progress bar appears and updates.

From here you'll be able to run and activate the program.

IMPORTANT:

If you change the installation location of the materials folder, or if your hard drive is named something other than Macintosh HD, or you have a non-English operating system, etc then you might have to go into the program's setup page after installation is complete and input the proper file path for the materials folder so that the program knows where to find the audio files.

The audio won't play if the system does not know where to find the files.

Go to the troubleshooting page of this guide for specific instructions.

You are finished installing. Now time to activate the program.

Launch the program

Go to the Applications folder.

Locate and open the program's folder.

Double click the program's app file to launch.

To save time in the future, you may want to create an alias on the desktop.

To do this, select the program's app and use the Command(⌘)+L key

You can also go to the Finder menu and select "Make Alias" once the program's app is selected.

An alias will be created in the program's folder.

You can then drag the alias to the desktop for quicker launching in the future.

Registering and Activating the Program

What you'll need.

- Internet access (yours or someone else's) It doesn't have to be on the "installed" machine.
- E-mail address where the activation key will be sent.

Registering

After installing and launching the program the first thing you will see is the Registration Page and countdown screen.

You will have 14 days to send in your registration number and obtain an activation code.

The number of "days left to activate" will be indicated every time you open the program if you haven't registered and inserted the key.

You can run the program for 14 days (without registering or applying the key) by clicking OK on the countdown / reminder Dialog Boxes and then click the Run button.

If you do not register or apply the activation key within the 14 day period then the program will not be accessible until you apply the license activation key.

If you do exceed that time period, once you register and apply the code, the program will resume normal operations.

IF YOU ARE NOT THE ORIGINAL PURCHASER, THEN YOU'LL NEED TO SKIP AHEAD SEVERAL SECTIONS TO THE "GIFT PURCHASE" TOPIC. YOU CAN'T REGISTER UNTIL THIS HAS BEEN COMPLETE

Step 1.

Fill out the Name and email address fields.

When you have filled in the fields, click the done button and a "Continue" button will appear.

Click Continue to be taken to the next page.

Step 2.

Next, click the blue “Submit Registration” button.

This will copy the registration number to your computer's clipboard.

NOTE: You do not need to look for any registration number. It is copied for you automatically. This number is not seen by you until the next step. (It isn't really necessary for you to see it anyway).

(If you don't have an Internet connection on the installed machine, then you can paste it to a Notepad document (etc) and copy that to USB drive or other media and transfer it to an internet machine)

The Registration web page will open automatically.

You can **also** use the Help>Activate menu command to go to the Registration web page.

Or open up your Internet connection and go to

<http://www.RealBookSoftware.com/Register5.01.php>

(this is a clickable link here). This address is case sensitive.

When the web page opens, read the guidelines then scroll down the page until you see this form.

Registration 5.0

If you are not the original purchaser then you must first submit additional details in order to be entered into the database. Do NOT submit multiple registrations for the same activation code. Keys are generated once a day.

Name *

First

Last

Registration # *

OS *

Operating System Version *

Other Email *

Activation code placed *

Submit

Enter the name and e-mail address that was used to purchase the product.
(If you are not the original purchaser then see the “Gift Registration” section for instructions)

Use the CTRL+V keys to paste the number that was stored on your computer's clipboard into the “Registration” field.

The screenshot shows a web form titled "Registration 5.0". At the top, it says "If you are not the original purchaser then you must first submit additional details in order to be entered into the database. DO NOT submit multiple registrations for the same activation code. Keys are generated once a day." The form has several fields: "Name" (with first and last name sub-fields), "Registration" (a large text input field), "OS" (a dropdown menu), "Operating System Version" (a text input field), "Other Email" (a text input field), and "Instruments played" (a text input field). A "Submit" button is at the bottom left. A callout box with a black border and white background points to the "Registration" field, containing the text: "Use CTRL+V keys to paste the code (copied to your clipboard) into the 'Registration' field".

Next, fill out all the remaining fields on the form.
OS - gives you a drop down menu for Windows or Mac
Operating System Version - means 7,7 64bit,8, 8.1, etc.

The remaining fields should be self-explanatory.

After completing the form, click the “Submit” button.

Do Not Repeatedly Register/Submit - If you attempt to resubmit the same code then you'll see a message that the code has already been used/submitted.

Do not use email addresses that require a secondary verification. (Earthlink etc.) You will not receive a response.

Let your spam filter know that any e-mails from RealBookSoftware.com are okay.

Receiving the activation code

After we receive your registration, someone will generate an activation code that will be included in the body of an e-mail that will be sent to the email address(es) that you provided.

This usually happens very quickly but allow 24 to 48 hours, since there is a live person involved.

(If you don't have an Internet connection on the installed machine, then you can copy it from your email machine to a USB drive or other media and transfer it to the installed machine)

Pasting the Activation Code

Step 3.

You will receive an email with the code embedded in the middle of the email text body. It will look like this

Here is the code for you to select, copy and paste:
RB13158427121100203096c4a1a7846c4a1a974728189199a3

Drag/Select/Highlight the entire code. Be careful not to include any additional characters at the beginning or end (such as spaces, line returns etc).

RB13158427121100203096c4a1a7846c4a1a974728189199a3

Then use the ⌘+C key command to copy the text/code.

Open/launch the RealBookSoftware program

Place your cursor in the white field and use the CTRL+V keys to paste the code. When finished, hit the "Done" button.

If the code is correct, then the "Activate" button will appear.

If the code is incorrect then you'll see this message

If you see this then you'll need to double check the code that you pasted and make sure that it is the EXACT code sent to you in the email. No extra characters at the beginning or end or no characters left out.

The email you receive after registration also provides you with a link to your Keyfile that was generated from your registration.

You'll need to download this and place it on your computer's "desktop." This is the main home screen that appears on your computer after you boot up. The program will then verify the file and activate the program

“Gift Purchase”

If you are not the original purchaser then there will be an extra step for you. You'll first need to provide us with your information so we can adjust the purchase information in our records in order to include you in our database. Once we have you in our database, you will be able to register and receive in the usual fashion. First, the blue “click here” link on the program’s “Registration Page” or use the menu command.

Then you'll be taken to the “Gift Registration” page

Click the link at bottom and this will take you to the “Gift Registration” web page. Or use the Help Menu.

“Gift” Registration
If you are not the original purchaser then you must provide your information as if you were the original purchaser. We will create an entry for you in our database so we can process your registration. After you submit the entry you will be returned to the registration page where you can submit your activation code.

Who gave you the Gift? *

Yes No

Your Name *

Yes No

Address *

Phone *

Email *

Other Email

Product ID you received *

Fill out all of the information and click “continue”.

We will then enter your information into our database as if you are the original purchaser.

Now you can go back and follow the regular registration process.

Launch the Program

Launch the program by going into the program's folder in the Applications folder. You can also make an alias for the program to launch from the desktop as was mentioned earlier.

If the activation code and keyfile were properly placed, then you will see the opening screen instead of the countdown screen.

If you still see the countdown screen then something wasn't done correctly.

Remember - Every "installation" requires its own individual key. Anytime you install or re-install, a new registration/activation is needed.

If there is still an issue, go back and repeat the process while following the instructions very carefully.

Great Jazz Solos Fakebook Software: Release Notes

Every effort has been made to match the transcription to the exact source recording. Huge amounts of research have been applied to achieve these results. In spite of this, there are several transcriptions that do not have matching recordings.

In some cases alternate recordings have been provided where the song and soloist are the same but the exact recorded solo has not been located. (Indicated by ☹)

Two reasons for this. The first is that there are inaccuracies inherent in the original Spaces Volume 6 fakebook. In most cases no such song title exists. (Indicated by ●)

In other cases, the recording possibly exists, but is so obscure that it remains unfindable at the moment. If you happen to have insights or access to these few recordings, please let us know.

Solo start times have also been indicated in the Audio Artist 2 slot, but certain media players may present a slightly different time than the ones indicated, but this is usually only a second or two difference.

Also bear in mind that the transcriptions originate from the prior publication "Spaces Fakebook Volume 6: Jazz Solos". No editing or modifications have been applied to the content, which also includes any inaccuracies present in the notation.

Charlie Parker Fakebook Software: Release Notes

Audio Artist 1 contains audios at full speed.,.

Audio Artist 2 contains audios that play back at half speed. This is helpful on some of the up tempo selections as well as some of the complex lines on ballads.

To play the half speed recordings simply hit the Audio 2 buttons or use the Audio Menu.

Bonus Files:

If a product had bonus files that were also included, then those can be found in a Bonus Files folder inside the Materials folder.

A quick way to access the folder is the Default Folder menus command or the Blue button on the Setup page next to the Default Filepath. These will open the Materials folder.

Troubleshooting

Activation Code

Every “installation” will require its own activation key content its own unique registration code.

It is important to know that this is not a one-size-fits-all registration. Codes are not universal. Be sure that the registration number you submitted belongs to the installation where you are trying to use the code.

Audio

All audio files are proprietary and for use with the program only.

Do not change, edit or in any way alter any aspect of these files (including the file names, tags, images etc.)

Any alteration of these files constitutes a breach of the license agreement and can cause the program to not function.

Default Filepath

The program automatically determines the factory setting location of the audio files, however, if you changed the location of the “Materials” folder then you'll need to change the path to the audio files.

1. Make sure that your Default file path is correct by
 - a. Go to the Setup Menu>Setup Command>
The default path is indicated there.

- b. If the indicated location doesn't match the actual location where your materials file is located, then you'll need to enter the correct file path to the "Materials" folder. Follow the instructions just underneath the default folder field. Watch out for extra spaces, Upper/Lower Case mismatches etc.

Hitting the reset button will restore the filepath setting to the original installation default location in the Hard Drive/Application/Program folder.

The default installation folder, where everything has been placed is
Macintosh HD/Applications/RealBookSoftware5.01m/Materials/

You may need to modify this if your Install Location does not exactly match.

This can happen if your hard drive is named something other than the “straight out of the box” name

For instance

Mac HD/Applications/RealBookSoftware5.01m/Materials/

Or if you named things differently

Mac HD/Applications/**RealBookReader**/Materials/

Watch out for extra spaces, Upper/Lower Case mismatches etc.

Support

We do not offer phone support.

We do offer help desk support for issues stemming from the installation and use of the software.

We cannot help in matters regarding your specific computer hardware, settings, other software etc.

If you have carefully read and followed the instructions outlined in this guide and have checked the online FAQ's yet still cannot resolve your issue then you can submit a Support ticket at www.RealBookSoftware.com/hesk

IMPORTANT: Be very detailed in your description of the issue you are having, what specific steps you have taken and where the problem emerges. Also indicate your specific operating system version.

Vague or brief sentences will only be responded to with a request for more detail and screen shots.

Include screen shots

This is important since it lets us see what you are seeing and helps to illustrate and pinpoint the exact nature of the problem you are experiencing, instead of trying to guess at it.

Go to your Applications>Utilities> folder and launch the Grab application.

This will be used to capture the images appearing on the screen, specific windows, etc. You can also use the apple command (⌘)/shift/3 keys together to capture the entire screen.

After capturing the images, you will then save them and attach them in your email.

And Finally....

We are always coming out with new products to enhance and enrich your experience with Jazz.

1. **Keep current** with the latest developments by visiting the web page at <http://www.RealBookSoftware.com/FakebooksAndMore.php>
<http://www.RealBookSoftware.com/Catalog.php>

2. **Spread the word and encourage others**

If you have enjoyed and benefitted from our products then please let others know about us so that they might also receive the same benefit and enjoyment.

3. Also, **send us your testimonials.**

We love hearing from people who are interested in keeping Jazz alive and growing. Let us know what products or enhancements you would like to see developed.
